Target Audience

Management and supervisory employees

Expected Duration

45-60 minutes

Workshop Objectives

By the end of this workshop, you will:

- Describe ways to foster positive relationships so that employees are open to your feedback, even when it's difficult to hear
- Distinguish employee behavior that's a "normal" bad day from behavior that's more seriously problematic
- Identify planning considerations to use before you begin a conversation about performance issues
- Use words and phrasing that give you the best chance for a productive conversation instead of one that becomes defensive or unproductive
- Be ready to offer resources to support employees who may react in concerning ways upon receiving feedback

Creating Psychological Safety in the Workplace

Overview/Description

Psychological safety is the belief that it's OK to take interpersonal risks without fear of undue consequences. In a psychologically safe environment, people are more likely to speak up when they see their team or organization heading down the wrong path. They're more likely to brainstorm and experiment in ways that help teams innovate, and they're less likely to go along with risky behaviors that create an unsafe workplace. Psychological safety allows a person to be themselves, which strengthens morale, sense of belonging, and employee retention. In this session, we'll discuss how leaders can foster a psychologically safe environment, and explore why people may feel psychologically unsafe without their leaders even realizing it.

Target Audience

Leaders that want employees who take appropriate risks, speak up when it's called for, and contribute to positive workplace morale

Expected Duration

45-60 minutes

Workshop Objectives

This training will help you:

- Define the elements of psychological safety
- Explain why psychological safety is so important in the workplace
- Assess how psychologically safe (or unsafe) your team or organization is today
- Describe tangible actions you can take to foster a psychologically safe environment

Leading with Authenticity

Overview/Description

Authentic leaders are great leaders- are you one? Regardless of who you are or who you lead authenticity is vital to cultivating work environments that are safe and supportive. Employees are seeking leaders who are ethical, firm in their beliefs and true to themselves. This training will examine the components of authentic leadership: self-awareness, internalized moral perspective, balanced processing, and relational transparency. By understanding these components every leader can discover their personal strengths and weaknesses so that they can better serve and support their employees in their personal and professional development.

Target Audience

Leaders aspiring to grow their leadership tool belt and foster a positive workplace culture.

Expected Duration

45-60 minutes

Workshop Objectives

This training will help you:

- Embrace balanced processing by learning how to avoid impulsive decision making
- Practice relational transparency by communicating clearly and consistently to set and maintain boundaries
- Strengthen your internalized moral perspective by understanding the importance of compassion and people centered leadership
- Develop self-awareness by identifying how your passion and purpose can carry you through times of negativity, conflict and challenge

Managing The Emotions Surrounding Layoff Conversations

Overview/Description

Delivering layoff messages generates a range of emotions for both the manager delivering the message and the employee receiving it. As a manager, you may feel guilt over having to be the bearer of such bad news. You may feel fear from many sources: fear about your own job security, fear about the impact the announcement will have on others, and fear about how the employee might react during the conversation. Some managers also feel anger, which could be directed toward senior leadership or others responsible for putting managers and the company in this difficult position. All of these emotions are normal and expected. This training helps you better understand these emotions so that you can stay in control of the situation and do your best, instead of allowing the emotions to take over and negatively impact the conversation and your own well-being.

Target Audience

Managers, supervisory staff and HR professionals who will deliver workforce reduction announcements

Expected Duration

45-60 minutes

Workshop Objectives

By the end of this workshop, you will:

- Normalize the emotions you are likely to feel when planning and delivering a layoff message
- Practice techniques to gain control of your own emotions so they don't control you
- Describe the emotional reactions you may encounter from the employee receiving the message
- Practice techniques to defuse emotions and help the employee absorb the message
- Identify support services and resources for all leaders and employees

This session will discuss common concerns in the remote environment including miscommunication, inefficient meetings and the value of trust. Key skills include managing communications, establishing meeting guidelines and identifying workplace behaviors that build, sustain, or break trust.

Incivility does not involve openly hostile behavior, threats or sabotage and therefore doesn't warrant the same legal attention or sanctions as other forms of mistreatment, such as harassment. Addressing Workplace Substance Use Concerns

Overview of Our Approach

Alcohol and drug misuse can impact workplace safety, productivity, and health. Understandably, organizations often put strict policies about substance use in place, in order to maintain workplace safety and to comply with government regulations. Those strict policies are most effective when combined with empathy toward the challenges faced by people who want to quit. Many employees want to get control of the problem, but doing so often seems too hard. This can be especially true around the holidays. Our recommended training approach is to address not only the impacts of substance abuse on the workplace, but also the factors that make it hard for employees to quit and stay in control.

Curriculum goals for the organization:

- Enforce strict substance use policies while still showing empathy toward employees who are struggling to comply.
- Increase the likelihood that employees will quit on their own, before the need for discipline or termination arises

Best practices:

- Whenever substance abuse policies are communicated to employees, include information about training and support services as part of the communication.
- Offer training mostly by webinar, so that employees can attend anonymously.

Recommended curriculum:

- Drinking Responsibly (Page 166)
- The Impact of Substance Abuse on the Family (Page 206)
- Managing Holiday Stress (Page 183)
- Overview of GuidanceResources® for Employees

Building Resilience to Prepare for a Crisis or Emergency

Overview of Our Approach

In the immediate aftermath of an unexpected emergency, organizations often scramble to maintain business continuity and also to ensure that employees are safe and supported. To an extent, this is inevitable, since it's impossible to predict the precise timing and scope of events like weather disasters, mass violence, etc. That said, there are skills that employees can develop to help make them more resilient, and therefore aid both individuals and the organization in the recovery from these kinds of events. Our training approach looks at four building blocks of resilience: self-awareness, emotional control, relationship management, and positive thinking.

Curriculum goals for the organization:

- Enable employees to “bounce back” from a crisis or unexpected setback.
- Maintain employee productivity even during highly challenging times.
- Support business continuity initiatives.

Best practices:

- Don't wait. Be proactive rather than reactive when it comes to building the skills employees need for resilience.
- Make resilience-building a part of year-round, regularly scheduled training, rather than merely a response to an incident.

Recommended curriculum:

- Resiliency: Bouncing Back After a Setback (Page 136)
- Stress: A Way of Life or a Fact of Life? (Page 137)
- Expecting the Unexpected: How to Think About Potential Crises (Page 126)
- Preparing for Financial Emergencies (Page 134)
- Being Adaptive in Order to Thrive in Our Ever-Changing World (Page 124)
- Using Kindness to Achieve Personal Success and Happiness (Page 121)
- Overcoming Your Distorted Negative Thinking (Page 109)

Boosting Employee Morale

Overview of Our Approach

Low workplace morale can result in poor work quality, excessive absenteeism and complaints from external and internal customers. We help employees who are suffering from low morale by encouraging them to consider the choices they have about the one thing they alone control while at work: themselves. We help employees see the choices they have about their own accountability, resiliency and engagement.

Curriculum goals for the organization:

- Maintain employee productivity and engagement.
- Build employee satisfaction and retention.
- Promote positive interactions among employees and with customers.

Best practices:

- Make training voluntary rather than mandatory.
- Encourage use of Guidance Resources Online.
- Consider training to deal with specific causes of low morale as applicable, such as stress in the workplace, lack of personal engagement or trust, or communication issues.

Recommended curriculum:

- Laughter, Humor and Play To Reduce Stress & Solve (Page 95)

Combating Workplace Bullying or Harassment

Overview of Our Approach

Bullying and harassment can negatively impact productivity and create compliance concerns for an organization. Our recommended training approach is to use ComPsych's personal development programs to address the issues that are often underlying causes, and separately deliver training to reinforce company policies about bullying and harassment. The training about company policies would include reference to the fact that personal development training is available to help people develop skills to help them respond to and/or avoid bullying or harassment. These skills can include conflict management, confidence, emotional control and interpersonal communication.

Curriculum goals for the organization:

- Eliminate the negative productivity effects of bullying and harassment from the workplace.
- Increase employee morale.
- Reduce concerns about compliance-related violations.

Best practices:

- Deliver training and communication about company policies before delivering training to address potential underlying causes of bullying and harassment.
- Once the policy expectations have been made clear, personal development training can be voluntary.

Recommended curriculum:

- Using Reason to Resolve Conflict (Page 29)
- The Confident You: Taking Charge of Your Life (Page 79)
- Managing Your Emotions in the Workplace (Page 101)
- Initiating Difficult Conversations (Page 21)

- Using Kindness to Achieve Personal Success and Happiness (Page 121)
- Personal and Professional Boundaries (Page 110)

Improving Team Dynamics

Overview of Our Approach

Poor team dynamics are usually the result of poor communication, especially in conflict situations. This often results in complaints to HR, and it can negatively impact team productivity. Our training approach is to provide team members with communication and conflict resolution skills that enable them to work well together, even when they disagree or have clashes in personality.

Curriculum goals for the organization:

- Improve employee productivity by reducing the distractions that exist when people can't get along.
- Improve employee morale.
- Free up HR time to address core business issues instead of getting bogged down in employee infighting that often seems like it should be trivial.

Best practices:

- Combine training with the setting and enforcement of clear expectations regarding employees' behavior toward one another.
- Consider making training mandatory, especially if the issue has existed for a long time and is having negative impacts.

Recommended curriculum:

- Using Reason to Resolve Conflict (Page 29)
- Giving Effective Feedback in Personal or Work Situations (Page 19)
- How to Deal With a Difficult Person (Page 20)
- Managing Your Emotions in the Workplace (Page 101)
- Using Kindness to Achieve Personal Success and Happiness (Page 121)
- The Impact of Attitude on Work and Life (Page 129)

Increasing Understanding About Mental Health

Overview of Our Approach

Despite improvements in recent times, stigma regarding mental health still exists and is a barrier to getting people treatment that would help them. As a result, people either miss work, or they come to work in a state of mind that makes it hard for them to be productive. Our approach is to use training as a way to encourage people to talk more openly about mental health and to emphasize the benefits of seeking help.

Curriculum goals for the organization:

- Encourage employees to seek help for mental health issues before they cause excessive absenteeism, presenteeism, or productivity decline.
- Create a supportive workplace environment.

Best practices:

- Tie training to broader events such as Depression Awareness Month or Suicide Awareness Month.
- Deliver mental health training mostly by webinar, to encourage attendance from people who might otherwise stay away from sensitive subject matter.
- Consider training to deal with specific causes of low morale, such as stress in the workplace, lack of personal engagement or trust, or communication issues.

Recommended curriculum:

- Mental Health Awareness (Page 186)
- Counseling and Therapy, Demystified (Page 163)
- Understanding Depression (Page 195)
- Suicide Awareness (Page 193)
- Connecting Mind and Body for Healthy Living (Page 160)

Preparing for Performance Reviews

Overview of Our Approach

The most effective performance reviews are a two-way dialogue, with the employee participating actively in the conversation, as opposed to passively taking in the feedback. Creating the kind of environment that fosters this kind of conversation can be challenging. Performance reviews are an important part of employee retention goals, since employees who leave an organization often cite lack of feedback or direction from their manager as a contributing feedback. Our training approach is to provide managers with communication tools that foster active participation from both sides during conversations about performance.

Curriculum goals for the organization:

- Build managers' confidence in their ability to deliver effective performance reviews.
- Build employees' ability to accept feedback in constructive ways.
- Increase the likelihood that performance conversations lead to improved behavior.
- Improve manager-employee relationships, contributing to improved employee retention.

Best practices:

- Recognize that training about communication skills is a component of broader communication and policies the organization must put in place to ensure effective performance reviews.
- Deliver training as close as possible to review time, so that the content is fresh in people's minds.

Recommended curriculum:

- Giving Effective Feedback in Personal or Work Situations (Page 19)
- Building Trust (Page 76)
- Where Are You Going? Goal Setting for Personal and Professional Success (Page 122)
- The Impact of Attitude on Work and Life (Page 129)
- Working Through Mistakes (Page 123)
- How to Receive Criticism and Make It Work for You (Page 128)

Providing Support After Job Loss Announcements

Overview of Our Approach

Announcements about job loss have wide-ranging impacts, therefore our recommended training approach addresses a wide range of audiences and needs. We help employees who are losing their jobs cope with the transition, and help them talk to their families about what happened. We help spouses and family members prepare for the stress and financial strain that may come. We help employees who are staying with the company remain engaged.

Curriculum goals for the organization:

- Demonstrate to all employees that the organization has a commitment to support people during this difficult time.
- Keep morale as high as possible, given the circumstances.
- Minimize the negative effects of gossip and rumors.
- Maintain productivity while employees remain in their jobs.

Best practices:

- Make training voluntary rather than mandatory.
- Wait at least two weeks after the announcement before offering EAP training to employees.
- Make training available to spouses and family members, in addition to employees.

Recommended curriculum:

- Living With Change (Page 130)
- Stress: A Way of Life or a Fact of Life? (Page 137)
- Talking to Your Child About Tough Issues Affecting the Family (Page 58)
- Managing Personal Finances (Page 149)

Relieving Workplace Stress

Overview of Our Approach

Stress is expensive for employers. One study (Leiter & Maslach) states that job stress is estimated to cost the U.S. economy \$300 billion in sick time, long-term disability, and excessive job turnover impacts. Our recommended training approach can address these issues through a variety of techniques. We can help employees and their family members set achievable goals to eliminate some stressors from their lives. For stressors that are unavoidable, we can help employees and their family members relieve their stress using both immediate responses and long-term approaches. We can even provide techniques to mindfully reduce feelings of stress by looking differently at the causes.

Curriculum goals for the organization:

- Minimize sick days taken due to stress.
- Minimize accidents on the job due to stress.
- Improve employee satisfaction and retention.
- Identify and address sources of stress.

Best practices:

- Make training voluntary rather than mandatory.
- Provide limited training choices over a long period (such as two topics a quarter over twelve months).
- Make training available to spouses and family members in addition to employees.
- Consider training to deal with specific causes of stress as applicable, such as change in the workplace, communication issues, personal engagement, or lack of respect.
- Encourage use of the Employee Assistance Program confidential counselors.

Recommended curriculum:

Supporting Employees Who Are New to the Workforce

Overview of Our Approach

Recent graduates and others entering the full-time workforce for the first time will face challenges. For some, taking feedback and direction may be a challenge, while others may struggle with the pace of the work. Dealing with ambiguity is also a challenge, as the assignments and “grading” mechanisms in the workplace are not always as clear-cut as they were in school. Our training approach is to address these issues with a broad set of skills that employees who are new to the workforce find valuable.

Curriculum goals for the organization:

- Speed the time it takes new employees to adapt to the workforce and become productive.
- Reduce the turnover that often comes when employees have trouble adapting.
- Minimize conflict between newcomers and their supervisors or co-workers who have been working for many years.

Best practices:

- Position training as a perk of the job rather than a punishment or disciplinary mechanism for employees who struggle to adapt to the workforce.
- Combine webinar delivery with some face-to-face programs that help build camaraderie and connection among new employees.

Recommended curriculum:

- How to Make a Habit of Success (Page 90)
- Being Accountable in Work and Life (Page 74)
- Time Management Principles (Page 118)
- Building Trust (Page 76)
- Secrets to Self-motivation (Page 114)
- Where Are You Going? Goal Setting for Personal and Professional Success (Page 122)
- Managing Personal Finances (Page 149)

Supporting First Responders

Overview of Our Approach

The stress that firefighters, law enforcement officers, and other first responders face on a daily basis can be overwhelming, and sometimes traumatic. Coping with trauma and crisis can be very hard, but it's also hard for people in these positions to take care of their physical and emotional health on a day-to-day basis. Our training approach is to address the potential impacts of trauma, while also emphasizing the importance of self-care as a regular part of daily living.

Curriculum goals for the organization:

- Provide support to employees who face trauma as part of their jobs.
- Reduce the impact of physical and mental health issues on first responders

Best practices:

- Include this training as part of new hire curriculum for first responders.
- Offer training at multiple times of day to accommodate shift workers.
- Supplement training with reminders that one-on-one support is also available

Recommended curriculum:

- Coping With a Traumatic Event (Page 125)
- Learning to Relax (Page 179)
- Connecting Mind and Body for Healthy Living (Page 160)
- Counseling and Therapy, Demystified (Page 163)
