

STATE OF DELAWARE PRESCRIPTION PLAN

Diabetic Medications & Supplies Savings Program

Medicare Part D Prescription Plan Members

The State of Delaware Diabetes Savings Program provides cost savings to members taking prescribed diabetic medications. Under the State of Delaware Medicare Part D Prescription Plan, diabetic supplies and medications are covered as follows:

	Coverage Details
Diabetic Supplies	<ul style="list-style-type: none"> • Diabetic supplies such as lancets, syringes/needles, and test strips provided, either at a participating retail pharmacy, a 90-day participating retail pharmacy, or CVS Caremark Home Delivery may be obtained under the prescription plan at <u>no cost</u> to the member. • Supplies do not need to be filled at the same time as diabetic medications.
Diabetic Medications	<ul style="list-style-type: none"> • Multiple diabetic medications may be obtained for <u>one copay</u> when filled at the same time at a 90-day participating retail pharmacy or the CVS Caremark Pharmacy (mail order*). • To ensure the lowest copayment for covered diabetic medications, <u>make sure to ask the pharmacy to process all diabetic medications on the same day and submit the lowest cost generic medication first.</u> <p>IMPORTANT: Diabetic medications are considered maintenance medications and must be filled in accordance with the Maintenance Medication Program. These medications must be filled as 90-day prescriptions to avoid a penalty copay after receiving three 30-day prescriptions.</p> <p><i>*Medications filled through CVS Caremark Pharmacy (mail order) will be processed at a 90-day copay, even if requested at less than a 90-day supply.</i></p>

How do I ensure I receive the lowest copayment?

Ask the pharmacy to process all diabetic medications on the same day and to submit the lowest cost generic medication first. The first medication processed by the pharmacy will determine member cost share.

- If two generic 90-day diabetic medications are filled at the same time, you will pay the generic copay for the first medication, and subsequent generic medications will not require copayment.
- If generic and preferred brand name 90-day diabetic medications are filled at the same time, ask the pharmacist to process the generic first and you will pay the generic copay for the first medication and the subsequent preferred brand medication will not require a copayment.

What happens if my doctor prescribes multiple diabetic medications?

When multiple diabetic medications are filled and purchased on the same day, you will pay one copay, but if the doctor in the same month, prescribes another diabetic medication that is filled on a different day, another copay will be assessed. Please work with your physician and pharmacist to coordinate the prescriptions to be processed on the same day.

What should my pharmacist do if they have questions about the diabetes program?

Pharmacists should contact the CVS Caremark Pharmacy Help Desk.

What if I have questions about the diabetes program?

Questions may be directed to CVS Caremark/SilverScript at 1-844-757-0448.
