

# Fiscal Year 2022 Budget Projection

## FY22 Monthly Budget Update for SEBC Meeting

June 29, 2021

# GHIP long term health care cost projections (FY22 monthly budget)

## Revised projections

- WTW presented a budget projection to the SEBC on 5/10, reflecting a FY22 deficit of \$47.0M
- Projections have been updated to show FY22 net income on a monthly basis to highlight when the GHIP Fund Equity will reach a deficit during FY22
- FY22 monthly budget also reflects the following updates from FY21 Q3 update presented on 5/10:
  - May claims experience now included in claims projection (\$1.2M deficit to budget in May); June claims still expected at FY21 budgeted level
  - Prior projections reflected full FY22 savings attributable to CVS Health PBM contract (\$30.4M); revised projections reflect savings on a paid basis
    - Assumes six-month lag on rebate payments; Commercial rebates for FY22 Q1 and Q2 expected to be received in FY22 Q3 and Q4
    - EGWP contract effective 1/1/2022; with six-month lag, FY22 rebates not expected to be received until FY23
    - Increases FY22 operating expenses by approximately \$12M
    - Other expenses annualized based on actual FY21 payments through April (prior projection reflected actuals through March)
- FY22 monthly budget and revised long-term projections shown under three scenarios:
  - Scenario 1: excluding potential COVID-19 reimbursements
  - Scenario 2: including anticipated COVID-19 reimbursement of \$23.3M (assumed to be received in July 2021)
  - Scenario 3: including anticipated COVID-19 reimbursement of \$23.3M as well as one-time supplemental bill funding of \$20m (assumed to be received in July 2021)

# GHIP long term health care cost projections (FY22 monthly budget)

## Premium increase scenarios

- Excluding potential COVID-19 expense reimbursement, the GHIP is projected to end FY22 with a \$55.5M deficit, first reaching deficit position in December 2021 (Scenario 1)
  - The Fund is projected to first reach deficit position in December 2021, return to a surplus position in February 2022, and ultimately reach deficit position for good in March 2022
- Including anticipated \$23.3M COVID-19 expense reimbursement (to be received July 2021), the GHIP is projected to end FY22 with a \$32.2M deficit, first reaching deficit position in April 2022 (Scenario 2)
- Including \$23.3M COVID-19 expense reimbursement and \$20M supplemental bill funding, the GHIP is projected to end FY22 with a \$12.2M deficit, first reaching deficit position in June 2022 (Scenario 3)
- The table on the following page illustrates the premium increases required to solve for the FY22 deficit by month of rate action, along with the corresponding FY23 deficit assuming no additional premium increases, for each of the three scenarios:

- FY22 Other Revenues (\$191.3m) include \$23.3m one-time COVID-19 expense reimbursement payment and \$20m supplemental bill funding expected to be received in July 2021
- 18.8% increase effective 7/1/2022 reduces FY23 deficit to \$0
- Additional 2% increase effective 7/1/2023 would create a \$30.2M deficit by the end of FY24
  - 7/1/2023 increase needed to solve for FY24 deficit: 5.5%

*It is evident that the COVID-19 pandemic will have an impact on health care costs. We have used available information and reasonable estimation techniques to develop health care cost estimates for the GHIP that reflect the impact of COVID-19. However due to the high degree of uncertainty associated with this pandemic, results may vary from the estimates provided.*
