I. Wayne Smith

Wayne Smith

I know a-lot of officers that just started taking this medication. I started three months ago. My wife just started three weeks ago. They sent a letter about two weeks ago saying they were removing Zepbound. Zepbound works different than Wegovy. They should have made notifications sooner. Zepbound initial dosing is four weeks of 2.5. It's not fair to allow the insurance company to continue allowing the perscription to be purchased only to have the drug yanked and start all over on a new drug. The 2.5 is a test to see how you react to the drug. So...why go through a "trial" to then have to go on a different drug and start a whole new trial? This whole thing plain stinks
