- Due to the IRA of 2022, Medicare has updated the catastrophic reinsurance payment for 2025. Previously, EGWPs were responsible for 20% of claims in the final Medicare Part D phase, the catastrophic zone. In 2025, that number jumped up to 60% responsibility and therefore we will see less reinsurance prospectively and during the true up.
- The reinsurance program is paid in two pieces an upfront Prospective payment and then a settlement provided within 12-15 months after year end. For 2025, CMS lowered the monthly prospective payment from \$71.09 in 2024 to \$30.41 in 2025. For 2026, that amount is expected to be \$47.92.
- Total Federal Reinsurance payments assumed to grow by 4% per year for 2027 and beyond.

# EGWP Revenues – Manufacturer Discount Program

 Due to the IRA of 2022, Medicare removed the Coverage Gap Discount Program for 2025 and replaced it with a similar program called the Manufacturer Discount Program, where discounts will still be passed back to EGWPs.

Feature	Coverage Gap Discount Program (Through 2024)	Manufacturer Discount Program (Starting 2025)
Benefit Phases Affected	Only applies in coverage gap ('donut hole') phase	Applies in Initial Coverage and Catastrophic phases
Brand Drug Discount %	70% manufacturer discount (coverage gap)	10% in Initial Coverage phase 20% in Catastrophic phase
Generic Drug Discount %	0% manufacturer discount	0% manufacturer discount (unchanged)
Plan Liability in Phase	5% brand cost, 75% generic cost (coverage gap)	Varies by phase; plan bears more catastrophic cost due to lower reinsurance
Beneficiary Liability	25% (brand or generic) unless employer wrap reduces it	Varies; \$2,000 OOP cap eliminates catastrophic cost sharing
TrOOP Impact	Manufacturer discount counts toward TrOOP (True Out-of-Pocket Maximum)	Manufacturer discount continues to count toward TrOOP
Employer EGWP Impact	Manufacturer funds concentrated in mid-year gap phase	Manufacturer funds spread across year; higher catastrophic plan liability
